# 02 INFORMATION ABOUT PRINCIPAL INVESTIGATORS/PROJECT DIRECTORS(PI/PD) and co-PRINCIPAL INVESTIGATORS/co-PROJECT DIRECTORS

Submit only ONE copy of this form **for each PI/PD** and **co-PI/PD** identified on the proposal. The form(s) should be attached to the original proposal as specified in GPG Section II.C.a. Submission of this information is voluntary and is not a precondition of award. This information will not be disclosed to external peer reviewers. *DO NOT INCLUDE THIS FORM WITH ANY OF THE OTHER COPIES OF YOUR PROPOSAL AS THIS MAY COMPROMISE THE CONFIDENTIALITY OF THE INFORMATION.* 

PI/PD Name:	John C Priscu										
Gender:		$\boxtimes$	Male		Fema	ıle					
Ethnicity: (Choose	e one response)		Hispanic or Lati	no	$\boxtimes$	Not Hispanic or Latino					
Race:			American Indiar	or A	Alaska	a Native

REQUIRED: Chec project ⊠	k here if you are curre	ntly	serving (or have	e pre	vious	sly served) as a PI, co-PI or PD on	any	y federally funded			
Ethnicity Definitio	n:										

Hispanic or Latino. A person of Mexican, Puerto Rican, Cuban, South or Central American, or other Spanish culture or origin, regardless of race.

#### **Race Definitions:**

American Indian or Alaska Native. A person having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.

**Asian.** A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.

Black or African American. A person having origins in any of the black racial groups of Africa.

**Native Hawaiian or Other Pacific Islander.** A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

White. A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.

#### WHY THIS INFORMATION IS BEING REQUESTED:

The Federal Government has a continuing commitment to monitor the operation of its review and award processes to identify and address any inequities based on gender, race, ethnicity, or disability of its proposed PIs/PDs. To gather information needed for this important task, the proposer should submit a single copy of this form for each identified PI/PD with each proposal. Submission of the requested information is voluntary and will not affect the organization's eligibility for an award. However, information not submitted will seriously undermine the statistical validity, and therefore the usefulness, of information recieved from others. Any individual not wishing to submit some or all the information should check the box provided for this purpose. (The exceptions are the PI/PD name and the information about prior Federal support, the last question above.)

Collection of this information is authorized by the NSF Act of 1950, as amended, 42 U.S.C. 1861, et seq. Demographic data allows NSF to gauge whether our programs and other opportunities in science and technology are fairly reaching and benefiting everyone regardless of demographic category; to ensure that those in under-represented groups have the same knowledge of and access to programs and other research and educational oppurtunities; and to assess involvement of international investigators in work supported by NSF. The information may be disclosed to government contractors, experts, volunteers and researchers to complete assigned work; and to other government agencies in order to coordinate and assess programs. The information may be added to the Reviewer file and used to select potential candidates to serve as peer reviewers or advisory committee members. See Systems of Records, NSF-50, "Principal Investigator/Proposal File and Associated Records", 63 Federal Register 267 (January 5, 1998), and NSF-51, "Reviewer/Proposal File and Associated Records", 63 Federal Register 268 (January 5, 1998).

## **CERTIFICATION PAGE**

## Certification for Authorized Organizational Representative (or Equivalent) or Individual Applicant

By electronically signing and submitting this proposal, the Authorized Organizational Representative (AOR) or Individual Applicant is: (1) certifying that statements made herein are true and complete to the best of his/her knowledge; and (2) agreeing to accept the obligation to comply with NSF award terms and conditions if an award is made as a result of this application. Further, the applicant is hereby providing certifications regarding conflict of interest (when applicable), drug-free workplace, debarment and suspension, lobbying activities (see below), nondiscrimination, flood hazard insurance (when applicable), responsible conduct of research, organizational support, Federal tax obligations, unpaid Federal tax liability, and criminal convictions as set forth in the NSF Proposal & Award Policies & Procedures Guide, Part I: the Grant Proposal Guide (GPG). Willful provision of false information in this application and its supporting documents or in reports required under an ensuing award is a criminal offense (U.S. Code, Title 18, Section 1001).

#### **Certification Regarding Conflict of Interest**

The AOR is required to complete certifications stating that the organization has implemented and is enforcing a written policy on conflicts of interest (COI), consistent with the provisions of AAG Chapter IV.A.; that, to the best of his/her knowledge, all financial disclosures required by the conflict of interest policy were made; and that conflicts of interest, if any, were, or prior to the organization's expenditure of any funds under the award, will be, satisfactorily managed, reduced or eliminated in accordance with the organization's conflict of interest policy. Conflicts that cannot be satisfactorily managed, reduced or eliminated and research that proceeds without the imposition of conditions or restrictions when a conflict of interest exists, must be disclosed to NSF via use of the Notifications and Requests Module in FastLane.

## **Drug Free Work Place Certification**

By electronically signing the Certification Pages, the Authorized Organizational Representative (or equivalent), is providing the Drug Free Work Place Certification contained in Exhibit II-3 of the Grant Proposal Guide.

#### **Debarment and Suspension Certification**

(If answer "yes", please provide explanation.)

Is the organization or its principals presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency?

Yes ☐ No 🛛

By electronically signing the Certification Pages, the Authorized Organizational Representative (or equivalent) or Individual Applicant is providing the Debarment and Suspension Certification contained in Exhibit II-4 of the Grant Proposal Guide.

#### Certification Regarding Lobbying

This certification is required for an award of a Federal contract, grant, or cooperative agreement exceeding \$100,000 and for an award of a Federal loan or a commitment providing for the United States to insure or guarantee a loan exceeding \$150,000.

## Certification for Contracts, Grants, Loans and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

- (1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract. Grant. loan. or cooperative agreement.
- (2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.
- (3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

## **Certification Regarding Nondiscrimination**

By electronically signing the Certification Pages, the Authorized Organizational Representative (or equivalent) is providing the Certification Regarding Nondiscrimination contained in Exhibit II-6 of the Grant Proposal Guide.

#### **Certification Regarding Flood Hazard Insurance**

Two sections of the National Flood Insurance Act of 1968 (42 USC §4012a and §4106) bar Federal agencies from giving financial assistance for acquisition or construction purposes in any area identified by the Federal Emergency Management Agency (FEMA) as having special flood hazards unless the:

- (1) community in which that area is located participates in the national flood insurance program; and
- (2) building (and any related equipment) is covered by adequate flood insurance.

By electronically signing the Certification Pages, the Authorized Organizational Representative (or equivalent) or Individual Applicant located in FEMA-designated special flood hazard areas is certifying that adequate flood insurance has been or will be obtained in the following situations:

- (1) for NSF grants for the construction of a building or facility, regardless of the dollar amount of the grant; and
- (2) for other NSF grants when more than \$25,000 has been budgeted in the proposal for repair, alteration or improvement (construction) of a building or facility.

# Certification Regarding Responsible Conduct of Research (RCR) (This certification is not applicable to proposals for conferences, symposia, and workshops.)

By electronically signing the Certification Pages, the Authorized Organizational Representative is certifying that, in accordance with the NSF Proposal & Award Policies & Procedures Guide, Part II, Award & Administration Guide (AAG) Chapter IV.B., the institution has a plan in place to provide appropriate training and oversight in the responsible and ethical conduct of research to undergraduates, graduate students and postdoctoral researchers who will be supported by NSF to conduct research. The AOR shall require that the language of this certification be included in any award documents for all subawards at all tiers.

## **CERTIFICATION PAGE - CONTINUED**

## **Certification Regarding Organizational Support**

By electronically signing the Certification Pages, the Authorized Organizational Representative (or equivalent) is certifying that there is organizational support for the proposal as required by Section 526 of the America COMPETES Reauthorization Act of 2010. This support extends to the portion of the proposal developed to satisfy the Broader Impacts Review Criterion as well as the Intellectual Merit Review Criterion, and any additional review criteria specified in the solicitation. Organizational support will be made available, as described in the proposal, in order to address the broader impacts and intellectual merit activities to be undertaken.

#### **Certification Regarding Federal Tax Obligations**

When the proposal exceeds \$5,000,000, the Authorized Organizational Representative (or equivalent) is required to complete the following certification regarding Federal tax obligations. By electronically signing the Certification pages, the Authorized Organizational Representative is certifying that, to the best of their knowledge and belief, the proposing organization:

- (1) has filed all Federal tax returns required during the three years preceding this certification;
- (2) has not been convicted of a criminal offense under the Internal Revenue Code of 1986; and (3) has not, more than 90 days prior to this certification, been notified of any unpaid Federal tax assessment for which the liability remains unsatisfied, unless the assessment is the subject of an installment agreement or offer in compromise that has been approved by the Internal Revenue Service and is not in default, or the assessment is the subject of a non-frivolous administrative or judicial proceeding.

#### **Certification Regarding Unpaid Federal Tax Liability**

When the proposing organization is a corporation, the Authorized Organizational Representative (or equivalent) is required to complete the following certification regarding Federal Tax Liability:

By electronically signing the Certification Pages, the Authorized Organizational Representative (or equivalent) is certifying that the corporation has no unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.

#### **Certification Regarding Criminal Convictions**

When the proposing organization is a corporation, the Authorized Organizational Representative (or equivalent) is required to complete the following certification regarding Criminal

Convictions: By electronically signing the Certification Pages, the Authorized Organizational Representative (or equivalent) is certifying that the corporation has not been convicted of a felony criminal violation under any Federal law within the 24 months preceding the date on which the certification is signed. AUTHORIZED ORGANIZATIONAL REPRESENTATIVE SIGNATURE DATE NAME TELEPHONE NUMBER EMAIL ADDRESS FAX NUMBER

## PROJECT SUMMARY

## Overview:

Through the unique global partnership that is the Antarctic Treaty system, the entire continent is formally designated as a natural reserve, devoted to peace and science. To visit, and operate in, an environment like this comes with a responsibility to do so carefully and with minimal impact. It is thus imperative that scientists, contractors and managers operating in Antarctica convene regularly to assess the state of the environment and delineate requirements for the future that will maintain the pristine nature of the continent. A region of Antarctica that is particularly vulnerable to human impact is the McMurdo Dry Valleys (MDV). This area is the largest ice-free expanse on the continent (ice free area = 4,500 km2) and encompasses a total area of 22,700 km2. The MDV contains cold desert soils millions of years old, special geological features and novel assemblages of primarily microscopic organisms. The landscape is a mosaic of glaciers, mountain ranges, permanently ice covered lakes, ephemeral streams and novel soil ecosystems. Materials are transported among landscape units by wind and water. Despite the apparent simplicity, complex interactions among species and between biological and physiochemical components occur within and between glaciers, streams, soils and lakes. The global uniqueness of this environment has led to increased levels of scientific research and tourism over the past decade. Given the increase in human presence, it is important to assess routinely the impact of these activities for both ethical and scientific reasons.

#### Intellectual Merit:

It has been 17 years since environmental stewardship of the McMurdo Dry Valleys (MDV) has been formally addressed. During these 17 years, research activities in the valleys have increased exponentially and major research campaigns have been established in the Taylor, Wright, Miers, Garwood, Beacon and Victoria Valleys. This 17 year period has seen the implementation of a dry valleys Specially Managed Area (ASMA) and several new Specially Protected Areas (ASPAs) in the region. Research has reached the point where we have to ask ourselves, are we beginning to sample our own disturbances? Given the relatively long hiatus since the last environmental assessment of the MDV, in concert with exponential increases in research activity, we propose to convene a fourth workshop to assess the environmental integrity of the region, discuss the success of present management strategies, and develop an international plan with which to move forward. The workshop will include more than 40 scientists, contractors and environmental manger to discuss environmental stewardship and scientific site integrity of the MDV. The document that will be produced by this workshop will set the stage for environmental stewardship in the MDV for the next decade.

## **Broader Impacts:**

Workshop participants have been carefully chosen to ensure gender balance and representation from all career levels. The early career scientists will have a chance to change the way they will work in Antarctica, allowing them to conduct research in an environment that they have had a hand in shaping. Individuals from five countries will participate, providing a global balance to the workshop. This international collaboration will allow the recommendations to have global implications on the way research is conducted in the McMurdo Dry Valleys.

## **TABLE OF CONTENTS**

For font size and page formatting specifications, see GPG section II.B.2.

Appendix Items:

	Total No. of Pages	Page No.* (Optional)*
Cover Sheet for Proposal to the National Science Foundation		
Project Summary (not to exceed 1 page)	1	
Table of Contents	1	
Project Description (Including Results from Prior NSF Support) (not to exceed 15 pages) (Exceed only if allowed by a specific program announcement/solicitation or if approved in advance by the appropriate NSF Assistant Director or designee)	5	
References Cited	1	
Biographical Sketches (Not to exceed 2 pages each)	2	
Budget (Plus up to 3 pages of budget justification)	4	
Current and Pending Support	1	
Facilities, Equipment and Other Resources	1	
Special Information/Supplementary Documents (Data Management Plan, Mentoring Plan and Other Supplementary Documents)	1	
Appendix (List below.) (Include only if allowed by a specific program announcement/solicitation or if approved in advance by the appropriate NSF Assistant Director or designee)		

<sup>\*</sup>Proposers may select any numbering mechanism for the proposal. The entire proposal however, must be paginated. Complete both columns only if the proposal is numbered consecutively.

## **Project Description**

## Statement of need

Through the unique global partnership that is the Antarctic Treaty system, the entire continent is formally designated as a 'natural reserve, devoted to peace and science'. Antarctica is regarded as the last great wilderness on our planet, still pristine with wildlife and landscapes that show little evidence of direct human activity. To visit, and operate in, an environment like this comes with a responsibility to do so carefully and with minimal impact. It is thus imperative that scientists, contractors and managers operating in Antarctica convene regularly to assess the

state of the environment and delineate requirements for the future that will maintain the pristine nature of the continent. A region of Antarctica that is particularly vulnerable to human impact is the McMurdo Dry Valleys (MDV). This area is the largest ice-free expanse on the continent (ice free area = 4,500km<sup>2</sup>) and encompasses a total area of 22,700 km<sup>2</sup> (Levy 2012) (Map 1). The MDV contains cold desert soils millions of year's old, special geological features and novel assemblages of primarily microscopic organisms. The landscape is a mosaic of glaciers, mountain ranges, permanently ice covered lakes, ephemeral streams and novel soil ecosystems. Materials are transported among landscape units by wind and water. The biological systems in the MDV are relatively simple; there are no vascular plants or vertebrates and few insects. Trophic interactions and biogeochemical cycles are largely limited to

microbiological populations and microinvertebrates. Despite the apparent simplicity, complex interactions among species and between biological and physiochemical components occur within and between glaciers, streams, soils and lakes. Recent evidence indicates that some of the valleys possess ancient subsurface brines that may influence contemporary surface ecosystem processes (Mikucki et al. 2015). The global uniqueness of this environment has led

to increased levels of scientific research and tourism over the past decade (Priscu 2001). Given the increase in human presence, it is important to assess routinely the impact of these activities for both ethical and scientific reasons.

## Former meetings addressing environmental management of Antarctica and the MDV

Environmental concerns from human activities on the Antarctic continent were first addressed in the 1960's and 1970 through proceedings of colloquia (Parker 1972) and published manuscripts (e.g., Parker 1979) on the topic. International workshops specifically addressing environmental management of the McMurdo Dry Valleys were convened in 1991, 1995 and 1998. A brief description of these workshops follows:

- Wharton, R.A. (ed.) McMurdo Dry Valleys: A cold Desert Ecosystem. Report of a NSF workshop held at the Institute of Ecosystem Studies, The New York Botanical Garden, Millbrook, New York, 5-7 October 1991.
- Vincent, W.F. (ed.) Environmental Management of a Cold Desert Ecosystem: The McMurdo Dry Valleys. Report of a NSF Workshop held at Santa Fe, New Mexico, 14-17 March 1995.
- Wharton, R.A. and P. T. Doran (eds.) McMurdo Dry Valley Lakes: Impacts of Research Activities. Report of a NSF held at the University of Illinois at Chicago, 15-17 July 1998.

The general conclusion from each of these workshops has been that the environment is extremely sensitive to human presence and special priority should be given to the protection of scientific values and integrity of the region. This conclusion recognizes the global significance of the McMurdo Dry Valleys as an information resource and it acknowledges the principal reason for human activities in the valleys from the past into the foreseeable future. Protection of the scientific values of this region also serves to protect many other values which characterize this environment.

It has been 17 years since environmental stewardship of the McMurdo Dry Valleys has been formally addressed. During these 17 years, research activities in the valleys have increased exponentially and major research campaigns have been established in the Taylor, Wright, Miers, Garwood, Beacon and Victoria Valleys. This 17 year period has seen the implementation of a dry valley's Specially Managed Area (ASMA) and several new Specially Protected Areas (ASPAs) in the region (Map 1). Research has reached the point where we have to ask ourselves, are we beginning to sample our own disturbances? Given the relatively long hiatus since the last environmental assessment of the MDV, in concert with exponential increases in research activity, we propose to convene a fourth workshop to assess the environmental integrity of the region, discuss the success of present management strategies, and develop an international plan with which to move forward. Discussion will focus on environmental stewardship and scientific site integrity.

## Approach and Organization

We propose to convene an international workshop in May 2016 at Colorado State University, CO (USA). Invitations will be sent to appropriate members of NSF, the Antarctic support

contractor (currently ASC), helicopter support personnel, tour operators, and key scientists who have conducted research on select components of the MDV ecosystem. The scientific invitations will include early, mid and late career scientists, and will ensure gender representation. The organizing committee for the workshop will consist of John Priscu (Chair-Montana State University), Berry Lyons (Ohio State University), Peter Doran (Louisiana State University), Diana Wall (Colorado State University), and Adrian Howkins (Colorado State University).

## The overarching objectives of the workshop will be to:

- 1. Outline documented and potential human impacts (including level of severity) from various research activities in the MDV.
- 2. Determine the efficacy of the present management strategies in the MDV (e.g., Specially Managed Areas, Specially Protected Areas, Tourist zones) and discuss potential changes with respect to environmental protection and implementation.
- Develop recommendations for management of future research and tourist activities in the area with an emphasis on logistical requirements needed to implement these recommendations.

## Specific questions to be considered by the participants:

- 1. What is the current research and tourist "footprint" in the area, and is it affecting the integrity of the ecosystem?
- 2. How is projected climate change in the area going to influence environmental management decisions?
- 3. How will drones affect the environment and what rules will be placed on their use?
- 4. We now have the dry valleys ASMA with new ASPA's in place since the last environmental review. How have these managed and protected areas provided environmental protection to the environment?
- 5. To what level do we need to catalogue sampling sites and sites of instrument deployment?
- 6. What are the current regulations for handling hazardous materials and are they adequate?
- 7. Are current guidelines for the response to environmental incidents (e.g., spills and other releases) adequate?
- 8. What is the effect of increased helicopter use on carbon deposition and landing sites in the MDV?
- 9. How will extended season research affect the integrity of the environment?
- 10. Do we need guidelines for ROV and autonomous deployments in the lakes?
- 11. What is the status of former sites of known pollution (e.g., Vanda Station)?

Day one of the meeting will include short presentations focusing on the status of selected ecosystem components and the present state of management. These presentations will focus on the overarching objectives and specific questions described above and set the tone for ensuing discussion. To encourage input from all participants, the objectives will be addressed in a working group format similar to that used in previous NSF-sponsored environmental

workshops on the McMurdo Dry Valleys. Two groups will be formed, each comprised of scientists, contractors and managers with expertise in the various activities associated with research and environmental protection in the MDV. Each Group will address the objectives and specific questions. The groups will then meet together to discuss the individual outcomes and develop a consensus of ideas. Writing groups will be formed to produce a draft report followed by discussion during the last day of the workshop. This format should allow all perspective ideas to be aired, discussed and put in writing. The Chair of the workshop will then work together with the organizing committee, discussion group leaders, and rapporteurs to prepare a final document for distribution in both hardbound format and as an electronic document. This report will build upon the three previous NSF-sponsored environmental workshops. The workshop report will also be submitted for distribution in the "LTER Network News", "EOS", the Committee of Managers of Antarctic Programs (COMNAP) and the Scientific Committee on Antarctic Research (SCAR). Highlights of the report will also be presented at the SCAR Open Science Meeting.

## **Tentative Schedule**

## Day 1

Day 2

Participants arrive; 7:30 pm, welcome social

Day 2	
8:30 am	Welcome and Introduction (Priscu)
8:45	History of Science Activity in the McMurdo Dry Valleys (Howkins)
9:15	Environmental Management of the McMurdo Dry Valleys (Harris)
9:45	Climate in the MDV: past, present and future (Marchant)
10:15	Break
10:45	Glaciological Research (Pettit)
11:45	Lunch
12:30 pm	Stream Research Activities (McKnight)
1:00	Dry Valley Soil Research Activities (Wall)
11:15	Lake Research Activities (Doran)
1:30	Group Assignments and Charges to Participants
2:00	Break
2:30	Groups I & II meet separately to consider the objectives 1 and 2 and questions
	to 5
5:00	Wrap Up (Priscu)
6:30	Reception and Dinner
DAYO	
DAY 3	Daview and Oak adde (Diese)
8:30 am	Review and Schedule (Priscu)
8:45	Groups I & II meet jointly to consider objectives 1 and 2 and questions 1 to 5
10:00	Break
10:15	Groups I & II meet separately to consider objective 3 and questions 6 to 11
11:15	Groups I & II meet jointly to discuss objective 3 and questions 6 to 11
12:30 pm	Lunch
1:30	Produce an outline for final report
3:00	Break
3:30	Break out into writing groups
6:30	Dinner

1

## Day 4

8:00 am Draft Reports Available

8:30 Groups I & II meet jointly to discuss draft reports

9:30 Break

10:00 Groups I & II meet jointly to complete draft reports

11:45 Wrap Up and Adjourn

Noon Lunch

1:00-3:00 pm Finalize Draft Report (organizing committee, discussion group leaders, and

rapporteurs)

## **Participants**

## **BUDGET JUSTIFICATION – Montana State University**

## F. PARTICIPANT SUPPORT COSTS: \$88,525

Airfare is requested for 31 North American-based participants who do not reside in the Denver area (\$650/participant) and 11 participants that do not reside in North America (\$2,500/participant): \$47,650 total

On-site costs. \$700 is requested for all participants. These costs include \$75/d for food per diem + \$125/night for hotel for a 3.5 day duration (\$75+\$125) x 3.5=\$700): \$700 x 49 = \$34,300 total

Ground transportation. \$75/participant is requested for ground transportation to/from the Denver airport (\$75x49 = \$3,675 total).

Coffee/light breakfast service for the duration of the workshop: \$2,900

## **G. OTHER DIRECT COSTS: \$3,500**

These funds will be used to pay design and printing costs for 500 high quality color glossy reports, and 500 glossy, full color pamphlets that highlight the recommendations of the workshop.

## H. TOTAL DIRECT COSTS: \$92,025

## I. INDIRECT COSTS: \$910

An off campus rate of 26% has been applied to publication costs for the report.

Participant support costs excluded from the indirect cost base according to GPG Chapter II.C.2.g.

## J. TOTAL DIRECT AND INDIRECT COSTS: \$92,935

Current and Pending Support (See GPG Section II.D.8 for guidance on information to include on this form.)

USE ADDITIONAL SHEETS AS NECESSARY

## **Facilities**

The School of Global Environmental Sustainability at Colorado State University will provide a room for the meeting with ample space for all the workshop participants. This room will be equipped with internet connectivity and audio-visual equipment for presentations. It will have the capacity for video-conferencing with participants who are unable to attend the meeting in person. Additional rooms will be provided for the breakout sessions that are scheduled in the program, which will also have internet connectivity and appropriate audio visual equipment. Xerox, fax, and scanning facilities will be provided by the School of Global Environmental Sustainability. A local arrangements committee is in place to take care of on-site organization, and there will be staff support from the School of Global Environmental Sustainability to help with planning. This staff support will assist with providing name-tags, programs, and other necessary materials for the workshop.

The Montana State University Office of Sponsored Programs will handle the distribution of funds required for participant support under the supervision of J. Priscu.

Space and computer facilities for all members of the organizing committee allow the level of communication necessary to conduct planning and final report preparation.

## **Data Management Plan**

The workshop is structured to ensure that a draft report is written before the last day. The workshop report will include an overview of the discussions and a list of recommendations to ensure that all nations involved remain stewards of the McMurdo Dry Valley environment. The report will be circulated to national delegates to the Antarctic Treaty, the Council of Managers of National Antarctic Program (COMNAP) and the Scientific Committee on Antarctic Research (SCAR). We will work with SCAR to ensure that all standing scientific committees address the recommendations in the final report.
